Milk Supply Agreement

GENERAL TERMS & CONDITIONS FOR THE NON-EXCLUSIVE SUPPLY OF MILK

1. DEFINITIONS & INTERPRETATION

1.1 Definitions

In this Agreement, unless the context otherwise requires:

ACM means Australian Consolidated Milk Pty Ltd ABN 19 130 716 899;

Agreement means this Agreement including the front page of this document, these General Terms and Conditions and Schedules including Schedule A (regarding Price Justification) and Schedule B (Specification Guide);

Applicable Laws means all laws, regulations and mandatory codes of practices (as amended from time to time) applicable to Milk production, broking, carriage and distribution including the Code;

Approved Organic Certifier means NASAA or any other accredited organisation which provides organic certification as nominated in writing by ACM to Supplier from time to time;

Business Day means a day other than a weekend or public holiday in Melbourne, Victoria;

Change in Control of an entity means that a person or entity who did not have Control of the entity (either alone or with associates) subsequently gains Control (either alone or with associates);

Code means the *Competition and Consumer (Industry Codes- Dairy) Regulations 2019* as regulated under the *Competition and Consumer Act 2010* (Cth);

Commencement Date has the meaning given to it in clause 2;

Confidential Information means all confidential, non-public or proprietary information exchanged between the parties before, on or after the date of this Agreement relating to the business, technology or other affairs of each party or which comes into a party's possession pursuant to, or as a result of, any negotiations or discussions in connection with this Agreement including the existence, nature and terms of this Agreement, and whether disclosed verbally, in writing, in electronic form or by any other means;

Control of a corporation includes the direct or indirect power to directly or indirectly direct the management or policies of the corporation or control the membership of the board of directors; whether or not the power has statutory, legal or equitable force or is based on statutory, legal or equitable rights, and whether or not it arises by means of trusts, agreements, arrangements, understandings, practices, the ownership of any interest in shares or stock of that corporation or otherwise;

Controller has the same meaning as in section 9 of the Corporations Act 2001 (Cth);

Conventional Milk means all Milk produced at or in respect of the Farm that is not Organic Milk and includes:

- (a) all non-organic Milk produced from dairy herds which are located on any part of the Farm from time to time (whether or not such herds are milked on that Farm); and
- (b) all non-organic Milk produced from the milking of dairy herds at the Farm from time to time (whether or not the dairy herds from which such Milk is produced are located on that Farm),

but excludes Milk used by Supplier at the Farm for the sole purposes of feeding the Supplier's calves on the Farm or human consumption on the Farm by those residing in any household located on the Farm;

Conventional Milk Agreement means any agreement between ACM and the Supplier, pursuant to which, the Supplier supplies ACM with Conventional Milk;

Conventional Minimum Price means the lowest Price for the Conventional Milk to be paid by ACM to Supplier. The amount of the Conventional Minimum Price shall be calculated by reference to the table set out on the front page of this document and otherwise in accordance with clause 5.3;

Cooling Off Period means a period of fourteen days after the Commencement Date;

Dispute means a dispute between the parties in relation to the subject matter of this Agreement

Dollars and \$ means the lawful currency of the Commonwealth of Australia;

End Date means the date upon which this Agreement will end, being the earliest of the following:

- (a) the date set out on the front page of this document; and
- (b) any date otherwise agreed in writing between the parties;

Event of Default has the meaning given to that term under clause 12.1;

Farm means the Supplier's dairy farm located at the address specified on the front page of this Agreement;

Force Majeure means an act of God, war, revolution or any other unlawful act against public order or authority, an industrial dispute including strike or other labour disturbances, a governmental restraint, a shortage or unavailability of raw materials or transportation, and any other event which is not within the reasonable control of a party, including without limitation climate conditions and acts of nature (including drought, fires, earthquakes and floods), epidemics, pandemics, embargos, accidents, quarantine restrictions, diseases and pests and availability or breakdown of machinery;

General Terms and Conditions means these general terms and conditions and includes the front page of this document;

GST Law has the meaning given by the A New Tax System (Goods and Services Tax) Act 1999 (Cth);

Insolvency Event means, in relation to a party, any one or more of the events or circumstances occurring in respect of a party:

- (a) except for the purpose of a solvent reconstruction or amalgamation which has the prior written consent of the other parties:
 - (i) an order is made that it be wound up or that a Controller be appointed to it or any of its assets; or
 - (ii) a resolution that it be wound up is passed;
- (b) a liquidator, provisional liquidator, Controller or any similar official is appointed to, or takes possession or control of, all or any of its assets or undertaking;
- (c) an administrator is appointed to it;
- (d) it enters into, or resolves to enter into, an arrangement, compromise or composition with any of, or any class of, its creditors or shareholders, or an assignment for the benefit of any of, or any class of, its creditors, or process is filed in a court seeking approval of any such arrangement, compromise or composition;
- (e) a reorganisation, moratorium, deed of company arrangement or other administration involving one or more of its creditors is proposed or effected;
- (f) it is unable to pay its debts or it is presumed to be insolvent under any applicable law;
- (g) as a result of the operation of clause 459F(1) of the Corporations Act 2001 (Cth), it is taken to have failed to comply with a statutory demand;
- (h) it stops or suspends or threatens to stop or suspend:
 - (i) the payment of all or a class of its debts; or
 - (ii) the conduct of all or a substantial part of its business;
- (i) where an individual, that individual is bankrupt or deemed at law to be bankrupt; or
- (j) anything having a substantially similar effect to any of the events specified in paragraphs (a) to (i) happens to it under the law of any jurisdiction;

Insured Amount means \$10,000,000.00;

Law means all Australian statutes, regulations and mandatory codes of conduct (as amended from time to time), including the Code which are applicable from time to time to milk production and distribution;

Levy means any charge or fee imposed by a state or federal government that is required to be paid by Supplier but collected by ACM in relation to the production of Milk;

Loss means any costs, expenses (including legal costs on a party/party basis), losses, damages, compensation, amounts paid on advice of legal advisers to compromise or settle a claim, taxes, outgoings or other payments;

Milk means the lacteal fluid product of a dairy cow and for the purposes of this Agreement, includes Organic Milk and Conventional Milk;

Monthly Forecast has the meaning given to it in clause 4.4;

NASAA means the National Association for Sustainable Agriculture, Australia;

Organic Certification Date means the date on which an Approved Organic Certifier grants the Supplier Organic Producer Certification;

Organic Certification Failure Date means the date on which an Approved Organic Certifier informs the Supplier that it has failed to obtain Organic Producer Certification in relation to Milk produced at or in respect of the Farm;

Organic Milk means all organic cow's Milk produced at or in respect of the Farm in a manner that ensures the Milk carries Organic Producer Certification and includes:

- (a) all Organic Milk produced from dairy herds which are located on any part of the Farm from time to time (whether or not such herds are milked on that Farm); and
- (b) all Organic Milk produced from the milking of dairy herds at the Farm from time to time (whether or not the dairy herds from which such Milk is produced are located on that Farm),

but excludes:

- (c) Milk used by Supplier at the Farm for the sole purposes of feeding the Supplier's calves on the Farm or human consumption on the Farm by those residing in any household located on the Farm; and
- (d) any Milk in such other quantities or produced in such circumstances as may be agreed by ACM in writing at its discretion;

Organic Feed means cow feed which the Approved Organic Certifier requires be used by the Supplier, or is approved for use, for the purposes of obtaining and maintaining Organic Producer Certification;

Organic Minimum Price means the lowest Price for Organic Milk to be paid by ACM to Supplier. The amount of the Organic Minimum Price shall be calculated by reference to the table set out on the front page of this document and otherwise in accordance with clause 5.2;

Organic Producer Certification means 100% organic certification as required by ACM from an Approved Organic Certifier to the Supplier for Milk produced at the Farm;

Organic Standards means the National Standard for Organic and Bio-Dynamic Produce as published by the Department of Agriculture and Water Resources and amended or replaced from time to time; and/or such other standards published by an Approved Organic Certifier as nominated by ACM in writing.

Premium Quality Milk means Milk that meets the standards specified in the Supplier Guide as applying to Premium Quality Milk;

Price Justification means the statement justifying calculation of the Minimum Organic Price and the Minimum Conventional Price at Schedule A of this Agreement;

Productivity Payment has the meaning given to it in clause 5.4.

Quality Standards means the quality standards set by ACM in relation to the supply of Milk to it, details of which are set out in Schedule B to this Agreement in the document entitled "Specification Guide";

Recipient Created Tax Invoice has the meaning given to that term in the GST Law;

Related Body Corporate has the meaning given to that term in the Corporations Act 2001 (Cth);

Specification Guide means the document at Schedule B to this Agreement;

Start Date of Milk Supply means the date set on the front page of this document which, subject to these General Terms and Conditions is the date upon which the Supplier will commence the supply of Milk to ACM;

Supplier means the Supplier whose details are specified on the front page of this document;

Term means the duration of this Agreement beginning on the Commencement Date and continuing until the End Date;

Transport Provider means the provider of milk transport from the farm to the place of processing.

2 Commencement Date and Duration of Agreement

2.1 Commencement Date

2.1.1 This Agreement will begin on the Commencement Date.

If this Agreement is signed by Supplier, the Commencement Date is the date upon which this document was signed by Supplier. If the Supplier is more than one person, the Commencement Date is the date upon which this document has been signed by all persons who enter into this Agreement as Supplier.

2.1.2 If this Agreement has not been signed by Supplier, the Commencement Date is the earlier of the following:

- (a) the date upon which Supplier, having been provided with a copy of this Agreement by ACM, verbally advises ACM that he/she/they agree to enter into a Milk Supply Agreement with ACM on the terms and conditions set out in this document; or
- (b) the first date on or after 1 July 2026 upon which ACM collects Milk from Supplier's Farm with Supplier's consent.

2.2 Cooling Off

This Agreement is subject to the Cooling Off Period during which time Supplier may end this Agreement by notification in writing to ACM. Any such notification must be made by email to supplier@acmilk.com.au

2.3 Duration

Subject to clause 2.2 and the provisions for early termination set out in this document, this Agreement commences on the Commencement Date and will continue until the End Date at which time it will finish.

2.4 Effect of entry into this Agreement upon any pre-existing milk supply agreement between ACM and Supplier

Any pre-existing milk supply agreement between ACM and Supplier that is ongoing as at the Commencement Date will automatically terminate upon the parties entering into this Agreement provided that this Agreement is not ended by Supplier during the Cooling Off Period. For the avoidance of doubt, if this Agreement is ended by Supplier during the Cooling Off Period, any pre-existing milk supply agreement with ACM will remain in full force and effect in accordance with its terms.

3. Organic Certification

3.1 If, as at the Commencement Date, Supplier does not have Organic Producer Certification and has not yet commenced its application to obtain Organic Producer Certification, then within 90 days of the Commencement Date, Supplier must make an application to an Approved Organic Certifier for Organic Producer Certification in respect of Organic Milk.

3.2 Subject to ACM pre-approving such cost in writing, ACM will pay for the direct administrative costs charged by an Approved Organic Certifier after the Commencement Date up to and including the point of Supplier achieving Organic Producer Certification in respect of the Organic Milk.

3.3 Subject to clauses 3.1 and 3.2, if Supplier does not have Organic Producer Certification on the Commencement Date, Supplier must at its cost do all other things reasonably required to successfully obtain Organic Producer Certification as soon as reasonably practicable.

3.4 Supplier may be required, as part of obtaining and maintaining Organic Certification, to undergo audits undertaken by Approved Organic Certifiers to ensure that its Organic Milk meets relevant conditions (as determined by ACM acting reasonably) for export. If this occurs

during the duration of this Agreement, and subject to ACM pre-approving the details of any such costs in writing, ACM will pay for or reimburse Supplier for the direct administrative costs incurred by Supplier in undergoing any such export market certification audits.

- 3.5 Supplier acknowledges that ACM's obligations to pay or reimburse costs under this clause 3 are limited to an initial application by Supplier for Organic Certification. If Supplier later ceases supplying Organic Milk to ACM and at any time after that during the duration of this Agreement reapplies for Organic Certification, ACM will not pay for or reimburse Supplier for any costs associated with any such re-application for Organic Certification.

4. Milk Supply

4.1 Milk Supply

During the Term of this Agreement, the Supplier agrees to continually supply Organic and Conventional Milk to ACM on a non-exclusive basis and ACM agrees to buy Supplier's Milk provided that it meets or exceeds ACM's Quality Standards as specified in clause 6 of this Agreement.

4.2 Supply of Organic Milk conditional upon Organic Producer Certification

- 4.2.1 The supply of Organic Milk under this Agreement is conditional upon Supplier obtaining Organic Producer Certification before it begins to supply Organic Milk to ACM.
- 4.2.2 It is a condition of the supply of Organic Milk to ACM under this Agreement that Supplier must at all times maintain its Organic Producer Certification and must comply with the Organic Standards regarding the production and supply of Organic Milk.
- 4.2.3 If Supplier becomes aware, at any time during this Agreement, that its Organic Producer Certification has been cancelled, revoked, suspended or in any way downgraded, it must immediately inform ACM of this.

4.3 Supplier to supply Conventional Milk to ACM if conditions for supply of Organic Milk not met during any part of the Term

If, for any reason, Milk supplied under this Agreement does not meet any of the conditions associated with the supply of Organic Milk, Supplier will supply Conventional Milk to ACM.

4.4 Monthly Forecast

On or before the Organic Certification Date the Supplier will, following consultation with ACM, specify and provide to ACM an annual forecast divided into months of Organic Milk to be supplied by the Supplier to ACM in respect of the Farm (**Monthly Forecast**).

5. Prices and Payment

5.1 ACM to pay Supplier for supply of Milk

- 5.1.1 ACM will pay Supplier for the supply of Organic Milk and Conventional Milk in accordance with this Agreement.
- 5.1.2 ACM may announce an increase or step-up to the amount it pays for Milk from time to time although it is not required to do so.
- 5.1.3 Under no circumstances, will ACM retrospectively decrease the amount it pays for Milk. In exceptional circumstances only, and as provided for under the Code, ACM may prospectively decrease the amount it pays for Milk.

5.2 Calculation of Organic Minimum Price

- 5.2.1 Calculation of the Organic Minimum Price will be in accordance with the table set out on the front page of this document under the heading "Organic Minimum Price".
- 5.2.2 ACM warrants that calculation of the Organic Minimum Price is in accordance with the Price Justification contained in Schedule A of this Agreement as required under section 14 of the Code.
- 5.2.3 The Organic Minimum Price is the amount payable by ACM for Premium Quality Milk. If the Milk supplied under this Agreement does not meet ACM's Quality Standards for the conditions of Premium Quality Milk as set out in the Specification Guide, the amount payable by ACM for Milk under this Agreement may be reduced. Any such reduction will be in accordance with the Specification Guide.

5.3 Calculation of Conventional Minimum Price

- 5.3.1 Calculation of the Conventional Minimum Price will be in accordance with the table set out on the front page of this document under the heading "Conventional Minimum Price".
- 5.3.2 ACM warrants that calculation of the Conventional Minimum Price is in accordance with the Price Justification contained in Schedule A of this Agreement as required under section 14 of the Code.
- 5.3.3 The Conventional Minimum Price is the amount payable by ACM for Premium Quality Milk. If the Milk supplied under this Agreement does not meet the conditions of Premium Quality Milk as set out in the Specification Guide, the amount payable by ACM for Milk under this Agreement may be reduced. Any such reduction will be in accordance with the Specification Guide.

5.4 Productivity Payment (if applicable)

- 5.4.1 A Productivity Payment will be paid to Supplier for the supply of Conventional Milk if the conditions for payment set out in this clause are

met. Any such payment will be in addition to the Conventional Minimum Price.

- 5.4.2 The Productivity Payment will be calculated on the basis of the total kilograms of Milk Solids which is supplied to ACM under this Agreement. The Productivity Payment (if any) will be calculated by multiplying the total kilograms of fat and protein in the Milk Solids supplied under this Agreement by the dollar amount in the table below:

Monthly Milk Solids Starting Range (Kg)	Monthly Milk Solids Ending Range (Kg)	Fat Rate	Protein Rate
0	2,999	\$0.00	\$0.00
3,000	5,999	\$0.02	\$0.044
6,000	7,499	\$0.03	\$0.066
7,500	8,749	\$0.05	\$0.110
8,750	10,799	\$0.08	\$0.176
10,800	13,999	\$0.10	\$0.220
14,000	17,499	\$0.14	\$0.308
17,500	19,999	\$0.16	\$0.352
20,000	29,999	\$0.18	\$0.396
30,000	39,999	\$0.20	\$0.440
40,000	49,999	\$0.22	\$0.484
50,000	79,999	\$0.24	\$0.528
80,000	99,999	\$0.25	\$0.550
100,000	999,999	\$0.26	\$0.572

- 5.4.3 If the Conventional Milk supplied under this Agreement does not meet the conditions of Premium Quality Milk as set out in the Specification Guide), the amount payable by ACM for Milk under this Agreement may be reduced. Any such reduction will be in accordance with the Specification Guide.
- 5.4.4 For the avoidance of doubt, it is acknowledged that the calculation and payment of any Productivity Payment will be based only on the supply of Conventional Milk (and will not factor in the supply of Organic Milk).

5.5 Payment

Unless otherwise agreed in writing by the parties, ACM will pay Supplier for the Milk supplied pursuant to this Agreement on or about the fifteenth day of each month for the Milk supplied during the prior calendar month. The amount payable for the Milk shall be the Organic Minimum Price and/or the Conventional Minimum Price (as the case may require):

PLUS

- 5.5.1 any applicable Productivity Payment;

MINUS

- 5.5.2 any deductions arising from a downgrading of the Milk in accordance with this Agreement;
- 5.5.3 any applicable Levy;
- 5.5.4 any costs incurred by ACM as a result of any additional testing of the Milk which has been requested by Supplier and which is not included in the testing ordinarily conducted by ACM at its own expense (details of which are described in Schedule B); and/or
- 5.5.5 any other deduction authorised by Law or the Supplier.

5.6 Recipient Created Tax Invoice

For the purpose of satisfying the requirements of the GST Law and any additional requirements as determined by the Commissioner of Taxation from time to time, ACM and Supplier agree that:

- 5.6.1 ACM may issue a Recipient Created Tax Invoice in respect of any supply by Supplier to ACM under this Agreement
- 5.6.2 Supplier must not issue a Tax Invoice in respect of any supply by Supplier to ACM under this Agreement unless ACM notifies Supplier that ACM will not be issuing a Recipient Created Tax Invoice for that supply;
- 5.6.3 ACM will issue the original or a copy of the Recipient Created Tax Invoice to Supplier within 28 days after the later of the date the relevant supply is made or its value determined and will retain a copy/original;

5.6.4 ACM will issue the original or a copy of an adjustment note to Supplier within 28 days after the adjustment is identified and will retain a copy/original; and

5.6.5 they must each remain registered for GST at all times during the Term.

5.7 Payment Instructions

5.7.1 At all times during this Agreement, Supplier is responsible for providing to ACM accurate details of recipient bank account(s) for payments due to Supplier (including, if applicable, any split in the payments due to Supplier). Supplier will provide all such information in writing in a form acceptable to ACM.

5.7.2 If, at any time Supplier wishes to make any changes to the recipient bank accounts into which payments are to be made by ACM under this Agreement, Supplier must provide updated written instructions to ACM in a form acceptable to ACM.

6 Quality of Milk

6.1 Quality Standards

Supplier must ensure that all Milk supplied by it to ACM complies with ACM's Quality Standards, details of which are contained in the Specification Guide which is Schedule B to this Agreement.

6.2 Testing

ACM may inspect and test Milk before collection, at the time of collection or after collection for the purposes of assessing whether Milk is compliant with ACM's Quality Standards. Such testing will be at ACM's expense. ACM will provide a copy of relevant test results to Supplier upon request.

6.3 Right of rejection and otherwise

6.3.1 The parties agree that ACM's right to accept or reject Milk (and upon what terms which may include the imposition of any price penalty or price reduction) will be based on Supplier's compliance with ACM'S Quality Standards and the outcome of ACM's inspection and testing in accordance with this Agreement.

6.3.2 If ACM rejects Milk because of a failure to meet ACM's Quality Standards, ACM must as soon as practicable, inform Supplier of the grounds of any reduction or rejection.

6.3.3 If ACM intends to take any adverse action regarding a defect in the Milk, it will issue a notice to the Supplier outlining any such action as soon as reasonably practicable.

6.4 Defects

If either party become aware of:

6.4.1 any possible, actual or potential defect, containment, fault or other condition in Milk supplied under this Agreement;

6.4.2 any matter that may impact upon compliance with any health standard, public policy or code;

6.4.3 any matter which may affect compliance with any law or regulatory health standard that party must, as soon as possible, advise the other party of the particulars of any such issue. The parties must cooperate, to the fullest extent possible, to diminish any risk to the public arising from a defect in Milk.

6.5 Variation of ACM's Quality Standards

ACM may, if required by law, unilaterally vary its Quality Standards. ACM will provide Supplier with notice of any such changes when it is reasonably able to do so.

7 Collection

7.1 ACM to collect Milk

ACM or its agent or representative will, at the cost of ACM, collect the Milk supplied by Supplier under this Agreement from the Farm. The quantity of the Milk collected will be measured in litres by a flowmeter fitted to the Tanker.

7.2 Access to Farm

Supplier must ensure that ACM and its representatives have safe and unrestricted access to the Farm as reasonably required to collect the Milk at any time on each collection day. Supplier must immediately notify ACM of any circumstances that may affect ACM's ability to collect Milk in accordance with this Agreement.

7.3 Volume

ACM requires that at least 500 litres of Milk is available for collection at any one time from the Farm. Supplier must ensure that all Milk collected by ACM under this Agreement is refrigerated, agitated and less than 48 hours old at the time of collection.

8 Risk and title

8.1 Supplier warranty

Supplier warrants that it owns the Milk supplied to ACM and that it has the right and authority to supply and sell the Milk to ACM free from any encumbrance, mortgage, charge or other security interests.

8.2 Transfer of risk and title

Risk and title to the Milk passes to ACM at the time the Milk is loaded into the Tanker at the Farm, provided however, risk and title in any Milk that is collected by ACM but then subsequently rejected in accordance with ACM's Quality Standards shall automatically revert back to Supplier.

9 Supplier to maintain Insurance

Supplier must, at its own cost, effect and maintain, during the Term, a public liability insurance policy with a minimum level of cover of the Insured Amount and all other insurance required to be held and maintained by law, including without limitation, workers' compensation insurance. Upon request, Supplier must provide ACM with satisfactory evidence that Supplier has complied, and continues to comply, with its obligations under this clause.

10 Compliance

10.1 Compliance with Applicable Laws and Standards

10.1.1 Each party must comply with all Applicable Laws in performing their obligations under this Agreement.

10.1.2 Supplier must, at its own cost hold and maintain all necessary licences, approvals and permits and the like required by any government authority or agency and must ensure that the Organic Milk produced by Supplier also complies with all Applicable Laws and standards.

10.2 Notification of non-compliance

Supplier must promptly notify ACM of any actual or suspected breach by Supplier of any Applicable Laws, licences, approvals, permits or ACM's Quality Standards in the performance of its obligations under this Agreement.

11 Inspection

Supplier must permit ACM, at any reasonable time during this Agreement to:

11.1 undertake any investigation at the Farm that ACM reasonably considers necessary; and/or

11.2 enter Supplier's property and Farm for the purposes of assessing the Supplier's compliance with this Agreement.

12 Default and Termination

12.1 Event of Default

Any one or more of the following will constitute an "Event of Default" in respect of a party ("**defaulting party**"), at the non-defaulting party's option:

12.1.1 the defaulting party defaults in the performance of a material obligation under this Agreement, and:

(i) the default is not capable of being remedied; or

(ii) if capable of being remedied, the defaulting party does not remedy the default within 14 days after notice requiring it to be remedied is given to the defaulting party by the non-defaulting party; or

12.1.2 an Insolvency Event occurs in relation to the party.

12.2 Default

If an Event of Default occurs in respect of a party, the non-defaulting party may terminate this Agreement by giving written notice to the defaulting party.

12.3 Force Majeure

If a party is unable either wholly or partially, as a result of a Force Majeure, to carry out its obligations under this Agreement, and:

12.3.1 notifies the other party promptly of the Force Majeure giving details of the Force Majeure, and of the extent to which it is unable to perform its obligations; and

12.3.2 attempts to circumvent the Force Majeure as quickly as possible, then that party's obligations will be suspended for the period of time they are affected by the Force Majeure.

12.4 Accrued rights

Termination of this Agreement does not affect any accrued rights or remedies of a party.

13 Indemnities

Supplier indemnifies ACM against any liability incurred by ACM as a consequence of:

13.1 any claim arising out of a death, injury or damage to property arising from or connected with Supplier's breach of this Agreement; and/or

13.2 any unlawful or improper conduct of Supplier and/or its employees, agents and representatives.

14 Mutual Warranties

Each party represents and warrants to the other party that:

- 14.1 It will abide by the procedures of milk production and processing which reflect minimum standards and practices in the dairy supply chain;
- 14.2 it is fully compliant with all relevant laws, regulations and codes of practice relevant to the productions and processing of milk in Australia;
- 14.3 it has full legal capacity and corporate authority or statutory power (as the case may be) to execute and properly perform its obligations under this Agreement;
- 14.4 it has obtained all necessary authorisations and approvals and taken all corporate and other action necessary to authorise the execution and proper lawful performance of its obligations under this Agreement;
- 14.5 this Agreement constitutes valid and binding legal obligations upon it, which are enforceable in accordance with the terms and conditions of this Agreement;
- 14.6 the execution and proper performance of this Agreement by that party does not contravene its constitution or other constituent documents, any applicable law or authorisation; or any agreement or obligation binding upon it or applicable to its assets, revenues or business.

15 Supplier may be more than one person

If Supplier is more than one person, all parties who sign this agreement as Supplier are jointly and severally liable for the obligations of Supplier under this Agreement.

16 Confidentiality

16.1 General Obligation of Confidentiality

Each party must keep the Confidential Information confidential and not disclose it or allow it to be disclosed to any third party except:

- 16.1.1 with the prior written approval of the other parties; or
- 16.1.2 to officers, employees and consultants or advisers of the party (or its Related Bodies Corporate) who have a need to know (and only to the extent that each has a need to know) for the purposes of this Agreement and are aware that the Confidential Information must be kept confidential; and
- 16.1.3 take or cause to be taken reasonable precautions necessary to maintain the confidentiality of the Confidential Information.

16.2 Exceptions

The obligations of confidentiality under this Agreement do not extend to information (whether before or after the Commencement Date):

- 16.2.1 disclosed to a party, but at the time of disclosure is rightfully known to or in the possession or control of that party and not subject to an obligation of confidentiality on the party;
- 16.2.2 that is public knowledge (except because of a breach of this Agreement or any other obligation of confidence); or
- 16.2.3 required to be disclosed by law or any order of any court, tribunal, authority or regulatory body or in connection with the enforcement of this Agreement or by the rules of a recognised stock exchange.

16.3 Survival

This clause survives termination of this Agreement.

17 Complaints and Dispute Resolution

- 17.1 Where a dispute arises in connection with any aspect of this Agreement, the parties acting with good faith, will use all reasonable endeavours to bring any such issue to the attention of the other party in a timely fashion and in any event within 60 days of any such dispute coming to their attention.
- 17.2 Notification by one party to the other must be in writing and include the nature of the dispute and the desired resolution.
- 17.3 If a Supplier wishes to notify ACM of a dispute in connection with this Agreement, any such notification should be made by email to complaints@acmilk.com.au.
- 17.4 Within seven days of receipt of a notification in accordance with clause 16.2, a party will provide a response in writing including setting out steps it intends to take to resolve the dispute.
- 17.5 If, after attempting to resolve the dispute for a period of at least 60 days, the parties are not reconciled, they agree to then participate in a mediation to be conducted in accordance with the Code.
- 17.6 If, after undertaking mediation in accordance with the Code, the parties are still not reconciled, they may then submit to an arbitration to be conducted in accordance with the Code.

17.7 Unless otherwise agreed in writing, the parties shall each bear their own legal costs associated with any mediation and/or arbitration pursuant to this Agreement.

17.8 Nothing in this clause will prevent a party from seeking an injunction.

18 GST

18.1 If GST is payable by a supplier (or by the representative member for a GST group of which the supplier is a member) on any supply made under or in relation to this Agreement, the recipient must pay to the supplier an amount (GST Amount) equal to the GST payable on the supply. The GST Amount is payable by the recipient in addition to and at the same time as the net consideration for the supply.

18.2 If a party is required to make any payment or reimbursement, that payment or reimbursement must be reduced by the amount of any input tax credits or reduced input tax credits to which the other party (or the representative member for a GST group of which it is a member) is entitled for any acquisition relating to that payment or reimbursement.

18.3 This clause is subject to any other specific Agreement regarding the payment of GST on supplies.

18.4 Any reference in this Agreement to a price, fee, cost, expense or other similar amount is a reference to that amount exclusive of GST.

19 General

19.1 Legal Relationship

Nothing in this Agreement is to be construed as creating a partnership, trust arrangement, joint venture, agency, employment relationship or any form of legal relationship between the parties beyond contractual obligations.

19.2 Assignment

19.2.1 Supplier must not transfer or subcontract any right or liability under this Agreement without the prior written consent of ACM (which shall not be unreasonably refused).

19.2.2 If Supplier purports to subcontract, assign or novate any right, interest or liability under this agreement or is subject to a Change in Control without ACM's prior written consent, ACM may immediately terminate this Agreement on written notice to the Supplier.

19.2.3 ACM may assign its rights and novate its obligations under this Agreement to:

- (i) any Related Body Corporate or to a new holding company or controlling entity; or
- (ii) to any entity under the common control of those shareholders controlling ACM;

and may notify Supplier of any name changes, by notice in writing effective immediately, and without approval from Supplier.

19.3 Compliance with the Code

This Agreement is intended to comply with the Code and to the extent that there is any inconsistency between its terms and the Code, then the Code prevails. If any part or whole of one of more provision of this Agreement does not comply with the Code, then any such provision or provisions are severed from this Agreement. In such event, the validity and enforceability of remaining provisions of this Agreement will be unaffected.

19.4 Set Off

ACM may set off any amounts due to Supplier under this Agreement against any amounts due by Supplier to ACM.

19.5 Notices

19.5.1 Any notice to or by a party under this Agreement must be in writing and signed by the sender or, if a corporate party, an authorised officer of the sender.

19.5.2 Any notice may be served by delivery in person or by post or email or transmission by facsimile to the address or number of the recipient specified on the front page of this document or most recently notified by the recipient to the sender.

19.5.3 Any notice is deemed received under this Agreement:

- (i) if delivered by hand, on delivery;
- (ii) if delivered by post, on the third Business Day following posting if sent and received within Australia;
- (iii) if delivered by facsimile, on production of a transmission report by the machine from which the facsimile was sent in its entirety to the facsimile number of the recipient, specifying the correct number of pages sent, the date and time of transmission and that transmission was successful, provided that the onus of proving receipt shall be on the sender;
- (iv) if delivered by email, in accordance with the *Electronic Transactions Act 2000* (Vic)

but if a notice is received on a day that is not a Business Day, or after 5.00 pm (recipient's time) on a Business Day, the notice will be deemed to have been received at 9.00 am (recipient's time) on the next Business Day.

19.6 Governing law and jurisdiction

19.6.1 This Agreement is governed by and construed in accordance with the laws governing the State of Victoria in Australia and each party irrevocably and unconditionally submits to the non-exclusive jurisdiction of the courts of that State and Country.

19.6.2 Subject to compliance with the dispute resolution process contained in this Agreement and the Code, remedies in this Agreement do not exclude remedies available to a party in law or in equity.

19.7 Variations

19.7.1 Supplier cannot unilaterally vary this Agreement.

19.7.2 ACM cannot unilaterally vary this Agreement other than to comply with any changes in the Law.

19.7.3 Any variation to this Agreement will be deemed to be agreed by both parties if:

(i) ACM announces a step up to the Minimum Price in accordance with this Agreement;

(ii) such variation is agreed to in writing by both parties or is otherwise made in accordance with the Code.

19.8 Pre-contractual negotiation

This Agreement expresses and incorporates the entire Agreement between the parties in relation to the provision of the Services and supersede any prior representations, negotiations, arrangements, understandings or agreements and all other communications.

19.9 Waivers and consents

19.9.1 Any failure by any party to exercise any right under this Agreement does not operate as a waiver and the single or partial exercise of any right by that party does not preclude any other or further exercise of that or any other right by that party.

19.9.2 Unless otherwise expressly provided in this Agreement, a party may give its consent conditionally or unconditionally, or withhold its consent or approval, in its absolute discretion.

19.10 Remedies

19.10.1 The rights of a party under this Agreement are cumulative and not exclusive of any rights provided by law.

19.10.2 The expiration or termination of this Agreement does not affect any rights that have accrued to a party before the expiration or termination date.

19.10.3 Any right or obligation of a party that is expressed to operate or continue after the termination or expiration of this Agreement for any reason, will remain in full force and effect.

19.11 Severability

Any provision of this Agreement which is invalid in any jurisdiction is invalid in that jurisdiction to that extent, without invalidating or affecting the remaining provisions of this Agreement or the validity of that provision in any other jurisdiction.

19.12 Counterparts

This Agreement may be executed in any number of counterparts, all of which taken together are deemed to constitute one and the same document.

SCHEDULE A– PRICE JUSTIFICATION

In setting Milk prices, ACM conducts its own assessment of the best dairy market intelligence it has available, including current global supply and demand, global physical dairy ingredient price trends and global dairy derivative markets.

There is also consideration of the current Milk and ingredient values in the US and EU that may affect Oceania prices. Subsidies that impact production in the US and EU, trade wars, market interference through product storage or Milk output reduction schemes all have an impact on the price of Milk.

In determining its Milk price for the 2026/27, 2027/28 & 2028/29 year, ACM has also taken into account supply chain challenges currently affecting the Australian economy, inflationary pressures and a general lack of confidence around cash flow issues in many sectors of the economy.

Milk consists of solids (butterfat, protein, lactose, and minerals) in water, which makes up about 87% of the volume. The butterfat and protein components of Milk are those on which ACM base its farmgate price. Traditionally protein has been the most valuable component and the price ratio of protein to butterfat used by ACM is 2.2:1.

ACM pays a higher price for Organic Milk, as compared to Conventional Milk, with regard to its specialised nature and to the market demand for organic milk derived products.

Entry by Suppliers into exclusive (as opposed to non-exclusive) milk supply agreements provides ACM with greater certainty in terms of the total volume of its Milk supply. This increases ACM's ability to negotiate with and make commitments to its customers. ACM therefore offers a higher price to Suppliers who are prepared to enter into exclusive milk supply agreements and a lower price for Milk to suppliers who chose to enter into a non-exclusive milk supply agreement.

SCHEDULE B - SPECIFICATION GUIDE

1. **INTRODUCTION**
2. **PARTIES TO OPERATE WITH INTEGRITY AND FAIRNESS**
3. **MILK QUALITY**
 - 3.1 Milk Quality Standards Generally
 - 3.2 Bulk Milk Cell Count (BMCC)
 - 3.3 Bactoscan (IBC)
 - 3.4 Thermoduric
 - 3.5 Temperature
 - 3.6 Minimum Milk Composition
 - 3.7 Antibiotics
4. **FAILURE TO MEET MILK QUALITY STANDARDS**
 - 4.1 Prior Notification – Milk that doesn't meet ACM's Quality Standards
 - 4.2 Penalties Relating Specifically to Antibiotics
 - 4.3 Tanker Rejection other than Antibiotics
 - 4.4 Prohibited Residues
 - 4.5 EU Rolling Geometric Mean
 - 4.6 Minimum Pick Up Volume
 - 4.7 ACM May Suspend Collection of Milk
5. **AUDIT REQUIREMENTS**
6. **MILK QUALITY RESULTS**
 - 6.1 Text Message
 - 6.2 ACM Supplier App
 - 6.3 Tanker Docket
7. **FARM QUALITY ASSURANCE**

 - 7.2 Genetic Modification
 - 7.3 Animal Welfare
 - 7.4 Oestradiol Restrictions
 - 7.5 Crisis Management Policy
 - 7.6 Notifiable Diseases Policy
8. **GENERAL**
 - 8.1 Insurance
 - 8.2 Safe Working Environment
 - 8.3 Contact Information
9. **DEFINITIONS & INTERPERATIONS OF TERMS**

1. INTRODUCTION

ACM's business model is to operate in the value added stable dairy markets as close to the end consumer as possible. ACM is not a pure commodity player. We believe that our high value, direct to market approach will bring added stability to pricing and improves farmer confidence and certainty.

ACM looks forward to working with all of its Suppliers on an ongoing basis to ensure that the highest quality milk is delivered to customers.

This document, being ACM's Specification Guide, together with the General Terms and Conditions forms ACM's Agreement for the supply of organic milk ("**Milk Supply Agreement**") and Suppliers are encouraged to thoroughly familiarise themselves with its contents.

Suppliers must obtain Organic Producer Certification before they can commence the supply of organic milk to ACM. Organic Producer Certification must then be maintained by Suppliers throughout the Milk Supply Agreement as a condition for supplying organic milk. In order for milk supplied under this Milk Supply Agreement to be received as organic milk, ACM requires Suppliers to comply with the Organic Standards set by the National Association for Sustainable Agriculture Australia and the National Standard for Organic and Bio-Dynamic Produce (the export standard which is also sometimes referred to as the 'National Standard') used by the Australian government's Department of Agriculture.

If, at any time during this Milk Supply Agreement, Supplier does not have valid and ongoing Organic Producer Certification, milk supplied by them to ACM will be received on the basis that it is conventional milk. ACM welcomes Supplier's questions and feedback so please do not hesitate to contact us at any time.

2. PARTIES TO OPERATE WITH INTEGRITY AND FAIRNESS

ACM prides itself on operating with honesty, integrity and fairness in its business including its dealings with Suppliers. ACM's relationships with its Suppliers is based on mutual respect and understanding of both parties' commercial interests.

ACM takes very seriously the obligation to deal in good faith with Suppliers in all aspects of the Milk Supply Agreement. Suppliers are encouraged to approach ACM at any stage with any questions or concerns they may have regarding their ongoing working relationship with ACM.

3. MILK QUALITY

3.1 MILK QUALITY STANDARDS GENERALLY

To ensure that the milk ACM processes and sells is of the highest quality, ACM requires Suppliers to comply with a series of raw milk supply specifications based on the Organic Standards which are determined by reference to domestic and international industry regulations.

The Minimum Price paid by ACM to Suppliers is quoted on the basis that the Milk supplied is Premium Quality Milk. In order to be 'Premium', milk supplied to ACM must meet each of the 6 specifications referred to below ("**Premium Quality Specifications**")

If the milk supplied does not meet the Premium Quality Specifications, the amount paid by ACM for any affected milk will be reduced in accordance with the formula set out in Table 3.1. In addition, and depending on the particular

circumstances, if the milk supplied to ACM does not meet the Premium Quality Specifications, other penalties may apply.

Milk is graded as follows:

GRADE	CONSEQUENCE
Premium	Meets ACM's Premium Quality Specifications, Minimum Price & Productivity Payment (where applicable) is payable
Choice	Deduction of 3% from each of the Minimum Price & Productivity Payment (where applicable)
First	Deduction of 15% from each of the Minimum Price & Productivity Payment (where applicable)
Second	Deduction of 40% from each of the Minimum Price & Productivity Payment (where applicable)

Monetary penalties imposed by ACM if Milk does not meet Premium Quality Specifications.

Table 3.1

Test		Premium	Choice	First	Second
Price Reduction Penalty		0%	3%	15%	40%
BMCC (Cell/ml) – refer to paragraph 3.2 for details		≤250,000	250,001 – 400,000	400,001 – 500,000	>500,000
BACTOSCAN (IBC) – refer to paragraph 3.3 for details		≤100,000	100,001 – 250,000	250,001 – 464,000	>464,000
THERMODURIC – refer to paragraph 3.4 for details		≤2,000	2,001 – 5,000	5,001 -10,000	>10,000
TEMPERATURE – refer to paragraph 3.5 for details		≤5°C	5.01°C - 8°C	8.01°C - 10°C	>10°C
	Milk with temperature of 5°C or higher will not be collected at any time without prior ACM approval				
COMPOSITION Refer to paragraph 3.6	Butter Fat	≥3.0%	<3.0%	n/a	n/a
	Protein	≥ 2.4%	<2.4%	n/a	n/a
ANTIBIOTICS – refer to parts 3.7 & 4.2 for details	All milk supplied MUST be completely free of Antibiotics. Any milk supplied which returns a positive result for antibiotics will not be paid for.				
CUMULATIVE PENALTY					
BMCC, Bactoscan and Thermoduric 1st & 2nd Grade penalties will be CUMULATIVE TO A MAXIMUM OF 80%					
For Example: Milk supplied with first grade BMCC and First Grade Bactoscan and Second Grade Thermoduric the payment penalty will be BMCC 15% + Bactoscan 15% + Thermoduric 40% = 70%					

3.2 BULK MILK CELL COUNT (BMCC)

Test	Premium	Choice	First	Second
Price Reduction Penalty	0%	3%	15%	40%
BMCC (Cell/ml)	≤250,000	250,001 – 400,000	400,001 – 500,000	>500,000

BMCC test measures the number of white blood cells in Milk and can be used as a measure of herd health. As an approximate guide, each 100,000 cells/ml indicates about 10% of cows are infected. High BMCC levels in raw Milk can alter the manufacturing process by reducing shelf life, taste and overall quality of the product.

Testing: raw Milk samples are collected for each Milk pick up.

Grading: based on the 10 Day Period average result.

Penalty: initial result that falls outside of choice within a production year will be paid as Choice, consecutive results greater than choice will receive a period penalty of 15% or 40%.

Corrective Action Plan: Suppliers falling short of Premium Quality Specification for BMCC will be required to implement and document an appropriate action plan to ensure that future Milk supply meets Premium Quality Standards. If there is no clear improvement within a reasonable period of time as determined by ACM, Milk collection may be suspended as set out in Part 4.7.

3.3 BACTOSCAN (IBC)

Test	Premium	Choice	First	Second
Price Reduction Penalty	0%	3%	15%	40%
BACTOSCAN (IBC)	≤100,000	100,001 – 250,000	250,001 – 464,000	>464,000

The Bactoscan counts the number of individual bacteria cells in a raw Milk samples. It is used as an indicator of the cleanliness of the milking plant including the vat, as well as the effectiveness of Milk cooling.

When Milk is at a temperature of about 5°C, bacterial numbers can double within half an hour. This means that within two hours, 1,000 bacteria in a millilitre of Milk can become approximately 10,000 bacteria and, within 5 hours, 1,000,000. Temperature is key, below 5°C, the bacteria which affect Milk quality does not multiply. However, the bacteria are not killed they are just dormant waiting for an increase in temperature to start reproducing again.

Elevated levels of bacteria in Milk affect both its manufacturing properties and its shelf life. Measuring the number of bacteria in Milk is thus an extremely valuable measure of quality.

Testing: a raw Milk sample is collected randomly once each 10 Day Period. Bactoscan results falling outside Premium will be automatically retested. Retesting will continue until a Premium result is achieved.

Grading: based on the 10 Day Period average result, with any one result greater than 250,000 cells/ml to be excluded from the 10 Day Period average.

Penalty: initial result that falls outside of choice within a production year will be paid choice, consecutive results greater than choice will receive a period penalty of 15% or 40%.

Corrective Action Plan: Suppliers falling short of Premium Quality Specification relating to Bactoscan will be required to implement and document an appropriate action plan to ensure that their future Milk supply meets Premium Quality Standards. If there is no clear improvement within a reasonable period of time as determined by ACM, Milk collection may be suspended as set out in Part 4.7.

3.4 THERMODURIC

Test	Premium	Choice	First	Second
Price Reduction Penalty	0%	3%	15%	40%
THERMODURIC	≤2,000	2,001 – 5,000	5,001 -10,000	>10,000

Thermoduric bacteria are those which tolerate elevated temperatures, such as hot water plant/vat cleaning and the pasteurisation process.

There is often hard Milk residue on the upper surface of the Milk lines and visible residue in the tanks. Common causes include cracked inflations, leaking pipelines and other perished rubberwear. Build-up of Milk residue or water stone deposits due to poor cleaning practices can also spike Thermoduric results.

Bacteria spores can also be found in soil, grain and silage dust which can transfer to teats.

Testing: a raw Milk sample is collected randomly once each 10 Day Period. Thermoduric results falling outside Premium will be automatically retested.

NB: Testing requires 3 days of incubation.

Grading: based on the 10 Day Period average result.

Penalty: initial result that falls outside of choice within a production year will be paid choice, consecutive results greater than choice will receive a period penalty of 15% or 40%.

Corrective Action Plan: Suppliers falling short of Thermoduric Premium Quality Specifications will be required to implement and document an appropriate action plan to ensure that their future Milk supply meets Premium Quality Standards. If there is no clear improvement within a reasonable period of time as determined by ACM, Milk collection may be suspended as set out in Part 4.7

3.5 TEMPERATURE

Test	Premium	Choice	First	Second
Price Reduction Penalty	0%	3%	15%	40%
TEMPERATURE	≤5°C	5.01°C - 8°C	8.01°C - 10°C	>10°C
	Milk with temperature of 5°C or higher will not be collected at any time without prior ACM approval			

Rapid and effective cooling of Milk is essential for preserving its quality. Suppliers must cool their Milk to 5°C within 3.5 hours from the start of milking. Suppliers must have systems in place that demonstrate to ACM's satisfaction (acting reasonably) that Milk cooling and storage temperatures are maintained until Milk is collected.

Suppliers must provide and maintain a vat and refrigeration unit that, in ACM's reasonable opinion, is suitable for the safe, secure storage and cooling of daily Milk volumes. Vat temperature checks need to be recorded before and after each milking. Supplier must keep comprehensive records as to the temperature management of their vat and refrigeration unit. Vat and dairy plant maintenance reports must be maintained in accordance with the ACM Food Safety Program. (For details of the Food Safety Program, go to paragraph 7.1).

Poor temperature controls on farms are a major cause of Milk spoiling and products not meeting use by dates.

Milk with a temperature of greater than 5°C will not be collected at any time without a prior risk assessment being completed by the designated Transport Provider. In the event of a vat breakdown or power failure, Supplier must contact Transport, Farm Services, or the ACM emergency number 1300 669 212 immediately.

Refer to paragraph 8.3 for ACM's contact list, including 24-hour numbers.

Testing: prior to each collection via a sensory test and Tanker thermometer.

Grading: based on the 10 Day period average result.

Penalty: for initial result that falls outside of choice within a production year will be paid Choice, consecutive results greater than choice will receive a period penalty of 15% or 40%.

Corrective Action Plan: Suppliers falling short of Premium Quality Specification in relation to temperature will be required to implement and document an appropriate action plan to ensure that future Milk supply meets Premium Quality Standards. If there is no clear improvement within a reasonable period of time as determined by ACM, Milk collection may be suspended as set out in Part 4.7.

3.6 MINIMUM MILK COMPOSITION

Test		Premium	Choice
Price Reduction Penalty		0%	3%
COMPOSITION	Butter Fat	≥3.0%	<3.0%
	Protein	≥ 2.4%	<2.4%

ACM must comply with its customers’ raw Milk requirements regarding the composition of Milk. In particular, if butterfat and protein levels do not meet required standards, affected Milk will be rejected and redirected at ACM’s cost. As a result, a Minimum composition standard (“**Minimum Composition Standard**”) applies to all Milk supplied to ACM.

The Minimum Composition for Milk supplied to ACM is 3.0 percent butterfat and 2.4 percent protein. If this Minimum Composition Standard is not met, penalties will apply.

Testing: raw Milk samples are tested for each Milk pick up.

Grading: based on the 10 Day Period average result.

Penalty: Initial 3 consecutive 10 Day period results that falls outside of premium within a production year no penalty. Greater than 3 consecutive 10 Day period result that falls outside of premium will receive a period penalty of 3% Choice.

Corrective Action Plan: Suppliers falling short of Premium Quality Specification for Minimum Composition Standard will be required to implement and document an appropriate action plan to ensure that future Milk supply meets Premium Quality Standards. If there is no clear improvement within a reasonable period of time as determined by ACM, Milk collection may be suspended as set out in Part 4.7.

Suspend Collection: 15 consecutive 10 Day period results that falls outside of Premium.

3.7 ANTIBIOTICS

Test	All milk supplied to ACM MUST be completely free of Antibiotics. Any milk supplied returning a positive result for Antibiotics after collection will be penalised as set out in 4.2
ANTIBIOTICS	

It is essential that all Milk supplied to ACM is antibiotic free.

All Suppliers to ACM must hold a current Dairy Licence which requires them, among other things, to implement and maintain an Approved Food Safety Program.

The ACM Food Safety Program has been approved by the state Authorities and ACM recommends that it be adopted by Suppliers. For details of the ACM Food Safety Program, see 7.1. Alternatively, Suppliers may choose to comply with an appropriate Food Safety Program which has been approved by relevant government regulators of the state in which Supplier’s Farm is located.

Ongoing compliance with an approved Food Safety Program is essential to the production of Milk which is free of antibiotics. Suppliers must keep good records and follow vet and drug label use, ensuring that all withhold periods are calculated correctly and fully adhered to. Documentation is an essential part of good traceability.

Milk containing inhibitory substances including antibiotic residues poses a risk to human health. Antibiotic residues also affect the growth and acid production of starter cultures in the manufacturing process of cheese and cultured products.

Testing: Can be performed by a rapid or a broad-spectrum test. Milk can be tested prior to Milk collection, randomly at testing Laboratory, by transport or ACM customer.

Supplier: Raw Milk is randomly tested for antibiotics once per month.

Tanker: All Tankers entering ACM or Third-party sites are tested for antibiotics prior to unloading.

Penalty: Any un-notified antibiotic contaminations of antibiotics will result in automatic no payment for affected Milk and in addition, may also incur associated costs.

Milk collection will be put on hold until a traceback can be completed to identify the failure on Farm. Milk will need to be cleared of Antibiotics before collection can resume.

For further information in regard to penalties, refer to part 4.2.

4 FAILURE TO MEET MILK QUALITY STANDARDS

4.1 PRIOR NOTIFICATION – MILK THAT DOESN'T MEET ACM'S QUALITY STANDARDS

ACM seeks to work constructively with Suppliers to address any issues regarding Milk quality. It encourages early notification in order to minimize any losses which may otherwise be incurred when inferior quality Milk leaves the Farm and is mixed with other Milk. For this reason, it offers Suppliers up to 2 paid “**Prior Notification**” instances over the course of any one financial year. Suppliers are encouraged to notify ACM if they know or suspect that Milk is/may be unsuitable for pick up BEFORE the Tanker arrives at the Farm.

If a Supplier suspects that they may have Milk unsuitable for collection for any reason whatsoever, they should notify ACM (Farm Services) immediately. ACM will then conduct a risk assessment and advise the next steps. This may include having Milk tested prior to collection.

In order to make a Prior Notification, Supplier should contact Farm Field Services or ACM Kyabram Office 1300 669 212 and advise that they have Milk unsuitable for pickup prior to the arrival of the Milk Tanker.

In circumstances where Supplier has arranged to have a vat sample tested, Milk collection will be suspended until a result is available. Suppliers should place a “STOP Do NOT Collect” sign over the vat outlet. When a negative sample is achieved, Milk will then be scheduled for collection.

When Supplier takes up a Prior Notification, they are expected to dump the affected Milk according to relevant Environmental Protection Agency (EPA) guidelines. Likewise, if a vat sample returns a positive result.

Prior Notifications made in accordance with this clause will be paid at the Minimum Price and otherwise in accordance with this Milk Supply Agreement.

If Milk being collected fails a Tanker driver sensory check undertaken before pumping on, and Milk is then deemed to be unsuitable, the driver will not collect the Milk. This does not fall into the category of “Prior Notification” and ACM will not pay for the Milk in this circumstance.

4.2 PENALTIES RELATING SPECIFICALLY TO ANTIBIOTICS

All tankers contracted by ACM to collect Milk from Suppliers are tested for antibiotics prior to acceptance of milk by ACM's customers. See part 3.7.

4.2.1 POSITIVE TEST RESULTS FOR ANTIBIOTICS AFTER MILK IS COLLECTED AND HAS CAUSED THE TANKER TO RETURN A POSITIVE RESULT. UPON CUSTOMER RISK ASSESSMENT, MILK IS ACCEPTED.

Supplier will not be paid for this Milk as it has tested positive for antibiotics and is deemed to be in breach of ACM Food Safety Program (see part 7.1 for details) and Milk Quality Standards (see Table 3.1).

For all positive samples (vat or Tanker) Milk collection will be suspended until a negative sample is achieved. Any subsequent positive vat samples taken during this process will not be paid for. Only after a negative sample is achieved, will ACM schedule Milk for collection.

Supplier will be required to complete a CAR (Corrective Action Report) which is a requirement of ACM's Food Safety Program. Refer to section 13 Management of Non-Conformance - in the ACM Food Safety Program manual.

4.2.2 POSITIVE TEST RESULTS FOR ANTIBIOTICS AFTER MILK IS COLLECTED AND HAS CAUSED THE TANKER TO RETURN A POSITIVE RESULT. UPON CUSTOMER RISK ASSESSMENT, MILK IS REJECTED AND DEEMED UNFIT FOR HUMAN CONSUMPTION

Supplier will not be paid for this Milk as it has tested positive for antibiotics and is deemed to be in breach of ACM Food Safety Program (see 7.1 for details) and Milk Quality Standards (see Table 3.1).

Milk collection will be suspended until a negative vat sample is obtained. Any subsequent positive vat samples taken during this process will not be paid for. Only after a negative sample is achieved, will ACM schedule Milk for collection.

In addition, Supplier will be held responsible for costs and expenses incurred by ACM as a result of the positive screening, including but not limited to:

- The total cost of all Milk in the Tanker at the current value of the Milk, including Milk collected from other Suppliers;
- Any additional freight costs (eg, Farm to disposal site); and
- Any applicable disposal costs – (eg, handling of this Milk by EPA approved facilities).

A Recipient Created Tax Invoice (RCTI) Credit Note will be raised for the disposal cost and amount owing will be deducted from Supplier's Milk payment over a 3-month period (or such other period to be determined by ACM acting reasonably).

In any case where a Tanker load of Milk has been rejected, ACM is required to notify Dairy Food Safety Victoria of the residue detection within five business days of the initial detection with trace forward details (Part A Tanker). Trace back details (Part B Supplier) will be reported within ten business days of the incident.

Supplier will be required to complete a CAR (Corrective Action Report) which is a requirement of ACM's Food Safety Program. Refer to section 13 Management of Non-Conformance - in the ACM Food Safety Program manual.

4.2.3 POSITIVE TEST RESULTS FOR ANTIBIOTICS AFTER MILK IS COLLECTED UPON RANDOM MONTHLY TESTING.

Supplier will not be paid for this Milk collection as it has tested positive for antibiotics and is deemed to be in breach of ACM Food Safety Program 7.1 and Milk Quality Standards Table 3.1

Milk collection will be suspended until a negative vat sample is obtained. Any subsequent positive vat samples taken during this process will not be paid for. Only after a negative sample is achieved, will ACM then schedule Milk for collection.

In any case where a positive detection of Antibiotics is found, ACM is required to notify Dairy Food Safety Victoria of the residue detection within five business days of the initial detection with trace forward details (Part A Tanker). Trace back details (Part B Supplier) will be reported within ten business days of the incident.

Supplier will be required to complete a CAR (Corrective Action Report) which is a requirement of ACM's Food Safety Program. Refer to section 13 Management of Non-Conformance - in the ACM Food Safety Program manual.

4.3 TANKER REJECTION – OTHER THAN ANTIBIOTICS

ACM's customers may perform their own testing and risk assessment in relation to the Milk delivered to them by ACM (**Customer Risk Assessment**). Any such Customer Risk Assessment will generally be done before a Tanker is unloaded and may include extra testing including in relation to the following:

- Ph - acidity in Milk, souring
- DMC - Direct Microscopic Count, live bacterial colonies in Milk
- Freezing Point - water in Milk and/or
- Sediment.

If a Tanker load of Milk fails a Customer Risk Assessment and the Milk contained in that Tanker is not able to be on-sold elsewhere or used by ACM, all affected Milk contained in the Tanker may be disposed of.

If a Tanker load of Milk fails a Customer Risk Assessment, any Supplier who contributed Milk to that Tanker may be required to undergo additional screening and testing in order to determine which Supplier supplied the Milk which caused the failure of a Customer Risk Assessment. In such circumstances, ACM will conduct an investigation to determine the sources and causes of the failure. Supplier must cooperate fully with any such investigation.

If ACM is unable to recover the costs associated with having to dispose of Milk which has failed a Customer Risk Assessment, any Supplier who contributed Milk which led to such failure may be held liable for the costs incurred by ACM in relation to such Tanker and the costs of the disposal of affected Milk (including Milk delivered to ACM by other Suppliers).

4.4 PROHIBITED RESIDUES

Suppliers must comply with the *Agricultural and Veterinary Chemicals (control of Use) Act 2007*. This includes (but is not limited to) ensuring that all drugs and/or teat dips/sprays used have an appropriate approval number (ie. APVMA Approval Number or NRA Approval Number) in the course of supplying Milk to ACM. All records of use of either veterinary or agricultural chemicals need to be recorded in the ACM Food Safety Manual.

Prohibited inhibitory substances/residues include but are not limited to colostrum, herbicide, pesticides, wash water. They also include other contaminants and chemical residues such as Quaternary Ammonium Compounds (QACs) and Nonylphenol Ethoxylates (NPEs). A comprehensive list of prohibited inhibitory substances can be found at <https://apvma.gov.au>

Tankers are randomly screened for residues in Milk (AMRA) Australian Milk Residue Analysis.

The Australian Milk Residue Analysis (AMRA) Survey provides a national, independent chemical residue monitoring program in Australian bovine Milk. The AMRA Survey has a key role in promoting the dairy industry's reputation and facilitating ongoing market access by monitoring on-farm chemical use.

ACM encourages Suppliers to do everything they can to minimize the potential for contaminated Milk entering the supply chain. Suppliers should contact ACM (Farm Field Services) with any concerns about the potential for contaminated Milk before it is collected by the Tanker.

If an incident associated with the use of prohibited inhibitory substances occurs on Farm, Milk collection will be suspended. A risk assessment will be completed and communicated to the Supplier of the appropriate next steps in mitigating any risk to the supply chain.

4.5 EU ROLLING GEOMETRIC MEAN

The European Union (“EU”) has specific requirements for Milk cooling, Bacto/TPC and BMCC to ensure that Milk is not collected from unhealthy cows. Bacto/TPC and BMCC levels must be monitored from each Farm using a rolling geometric average.

Each Farm must maintain.

- Bacto/TPC average over two months of less than or equal to 100,000 bacteria/Cfu mL (Bactoscan equivalent is 464,000 IBC/mL) and
- BMCC average over three months of less than or equal to 400,000 cells/mL.

Geometric Mean results are reviewed by ACM on a monthly basis and reported on Supplier’s 10 Day Milk Reveal Record. If average TPC limits are greater than 100,000 bacteria/Cfu mL or BMCC limits are greater than 400,000 cells/mL:

- Suppliers will be notified of these results and ACM will follow up to ensure action is taken to correct the problem, preferably within the next monitoring period.
- Records of corrective action and follow-up must be kept as part of Supplier’s compliance with a Food Safety Program. For details of ACM’s Food Safety Program, see part 7.1.

Milk collected from Suppliers that does not meet EU TPC or BMCC limits within a reasonable period (as determined by ACM acting reasonably) must not be used in dairy products to be exported to the EU (two months for TPC, or three months for BMCC). ACM may suspend collection of Milk in such circumstances until Suppliers meet these standards.

4.6 MINIMUM PICK UP VOLUME

The minimum level of Milk supply for collection is 500 litres on skip a day basis. Volume suitable Milk must be able to be agitated to enable adequate cooling and sampling.

ACM may suspend collection when Milk volumes available to be collected drop below this level.

4.7 ACM MAY SUSPEND COLLECTION OF MILK

ACM may suspend Milk collection from a Supplier if, acting reasonably, ACM considers that Supplier is in material breach of the Milk Supply Agreement.

Circumstances in which ACM may suspend Milk collection include, but are not limited to, the following:

1. For a period of three months or longer during the Term of this Agreement, Supplier has delivered Milk assessed by ACM as being First Grade and/or Second Grade.
2. Milk tests positive for antibiotics at any time after a Tanker has arrived at the Farm to collect it.
3. Milk collected from Farms does not meet EU Bacto/TPC, or BMCC limits within a reasonable period as determined by ACM acting reasonably.
4. Prohibited and/or inhibitory substances are found in Milk supplied to ACM by Supplier.
5. ACM, acting reasonably, has safety concerns for any of its personnel, agents and/or contractors in relation to the collection of Milk from the Farm.
6. Supplier does not have, at any time during the course of this Milk Supply Agreement, a valid and current dairy licence issued by relevant state government which enables them to lawfully supply Milk to ACM.
7. Supplier fails to maintain all regulatory approvals that are needed to enable lawful supply of Milk to ACM.
8. Supplier fails to comply with a Food Safety Program (information about which is part 7.1).
9. Milk supplied by Supplier contains GM material, contrary to part 7.2.
10. Supplier fails to comply with Animal Welfare Standards as set out in part 7.3.
11. Suppliers use Oestradiol contrary part 7.4.
12. Supplier engages in Offending Behaviour contrary to part 8.2.

If ACM suspends Milk collection, it will not pay for any Milk which was otherwise to be collected.

A suspension of Milk collection by ACM may be temporary or permanent, depending on the particular circumstances.

5 AUDIT REQUIREMENTS

Suppliers must, at all times during the Milk Supply Agreement, maintain their Organic Producer Certification.

This means, among other things, that Suppliers must comply with and pass all ongoing auditing requirements by any approved certifying body (as applicable) who is accredited by the Department of Agriculture.

Approved certifying organisations can be found <https://www.agriculture.gov.au/about/contact/phone/approved-certifying-organisations>

6 MILK QUALITY RESULTS

ACM makes the results of its milk testing available to Suppliers in a number of formats.

6.1 TEXT MESSAGES

ACM allows up to 4 contacts per Supplier to receive daily milk quality results.

Zero indicates no result available for a particular test ie: Bacto. Refer to Milk Quality Index 3 for details of testing schedule.

Legend

Date	Collection Date
L	Litres
BF	Butter Fat %
P	Protein %
BMCC	Bulk Milk Cell Count
Bacto	Bactoscan (x1,000 IBC)
TH	Thermoduric (x1,000 CFU)
TMP	Temperature °C

ACM Alert

Advises supplier that a quality results is either at 1st or 2nd grade and requires investigation.

6.2 ACM SUPPLIER APP

The ACM Supplier App is a valuable tool that provides Suppliers with key production and quality information daily. Suppliers can monitor their live 10-day quality status to avoid payment penalties and set notification to receive alerts if they fall outside of Premium Quality Specifications for any one collection.

There are several Production and Financial Reports including:

Production

- BMCC Ranking report
- Milk Received Record (10-day slip)
- General monitoring of quality, production output and measuring current performance against historical data via interactive graphs

Financial

- Financial Year Activity includes YTD Income and Milk Invoices
- Financial Details by Cycle includes income & production by cycle, Monthly and YTD

Suppliers can choose to give their employees access to Production information whilst restricting visibility to Financial Reporting.

Download the ACM Supplier App from App Store or Google Play for free.

6.3 TANKER DOCKET

ACM SUPPLIER RECEIPT 919999	
Date: 09-02-2023	Time: 16.38
ABC Dairy Company	
Collection	
Truck:	7870
Run Number:	3059999
Volume:	14,216L
Temperature:	4.1 °C
Product:	Cow Milk
Pump stopped: 7870	
Carrier No:	500
Carrier:	SAPUTO North
ANALYSIS-	
SAMPLE DATE	07/02/2023
BMCC	158000Cells/L
Fat	4.58% m/v
Protein	3.19% m/v

Details of current pick up and prior pick up Quality Results (which are provided by tanker driver at time of milk collection).

7 FARM QUALITY ASSURANCE

7.1 ACM FOOD SAFETY PROGRAM

All Suppliers must comply with an approved Food Safety Program.

Upon entry into Agreement with ACM, Suppliers will be provided with ACM's Food Safety Program which has been approved by relevant State Regulatory Authorities (DFSV, NSWFA, TDIA). It is an essential tool to enable Suppliers to demonstrate that food safety risks are being effectively managed by them and that they are ensuring, on an ongoing basis, that Milk produced by them is safe for human consumption.

Implementation and ongoing compliance with the Food Safety Program will enable Suppliers to meet their licensing conditions.

ACM's Food Safety Program includes a requirement that Suppliers submit to an audit every two years. This audit will be conducted by an independent auditor who will assess Supplier's ongoing compliance and implementation of the Food Safety Program.

ACM will work constructively with Suppliers to help them achieve compliance with the Food Safety Program. However, in situations where ACM, acting reasonably, concludes that Supplier has failed to adequately address any matter which has arisen in regard to compliant implementation of the Food Safety Program and take corrective action as needed, ACM may suspend collection of Milk.

7.2 GENETIC MODIFICATION

ACM is committed to sourcing raw Milk which is free of genetically modified ("**GM**") material.

Suppliers are required to conduct a risk assessment prior to the introduction of any practice that may introduce any GM material into the Milk supply.

If Supplier has any concern regarding the potential for the introduction of GM material, they should contact ACM immediately.

7.3 ANIMAL WELFARE

The proper care and welfare of all animals on Farms is extremely important to ACM and it takes any incident relating to animal welfare very seriously.

ACM expects Suppliers to comply with industry standards in relation to animal welfare. These were originally released in September 2014 following an extended period of consultation with relevant stakeholders (“**Animal Welfare Standards**”) and maybe updated from time to time. Animal Welfare Standards are available from Dairy Australia and can be downloaded from its website (<http://www.dairyaustralia.com.au>). They are also available from ACM upon request.

Animal Welfare Standards comprehensive cover various aspects of animal welfare including:

- feed and water
- risk management of extreme weather, natural disasters, disease, injury and predation
- facilities and equipment
- handling and management
- castration, dehorning and spaying
- tail docking
- breeding management
- calf-rearing systems
- dairy management
- beef feedlots
- euthanasia

Also included in Animal Welfare Standards which Suppliers are expected to comply with are the Australian Animal Welfare Standards and Guidelines – Land Transport of Livestock (www.animalwelfarestandards.net.au) which have been implemented into state legislation with the aim of protecting the welfare of animals being transported and providing consistent regulation around Australia.

Any failure by Supplier to comply with Animal Welfare Standards constitutes a breach of this Milk Supply Agreement.

Any reported instance of non-compliance with Animal Welfare Standards will be fully investigated by ACM. Depending on the outcome of that investigation, ACM may provide support to Supplier ensure compliance, report the incident to the regulator and/or terminate the Supplier’s Milk Supply Agreement.

If Supplier requires guidance or assistance about applicable Animal Welfare Standards, they can contact ACM for assistance. Additionally, Dairy Australia provides several resources for farmers seeking further information about this issue at www.dairyaustralia.com.au

7.4 OESTRADIOL RESTRICTIONS

In 2008, the Australian dairy industry introduced a voluntary restriction on the use of oestradiol benzoate in lactating dairy cows. This occurred as a result of changes in export market regulations in which some countries banned the importation of dairy products that have been treated with oestrogen, including oestradiol. ACM requires that Suppliers adhere to this restriction.

Oestradiol is permitted to be used for oestrus synchrony programs in non-lactating heifers, however it cannot be used in lactating cattle. Suppliers should discuss alternative options for the treatment of non-cycling cows with their veterinarian.

7.5 CRISIS MANAGEMENT POLICY

ACM encourages Suppliers to have a written emergency plan in place, that they can refer to in the event that the Farm is materially affected by fire, storm or flood. It also makes good business sense to periodically check the Farm for hazards, risks and areas of vulnerability especially if it can be linked to a review of your emergency planning.

Recognising hazards and taking steps to reduce or eliminate them will help to create a safer environment for Suppliers their employees and any Farm visitors. For more information, look to the Dairy Farm Emergency Preparedness Checklist- Dairy Australia (www.dairyaustralia.com.au).

In the event of a “crisis” (fire, storm or flood) within the ACM collection region, Milk pick up will continue where practicable and safe to do so. Milk quality related issues such as temperature and BMCC are paramount and Milk will only be collected from Suppliers if and when ACM can verify the quality of Milk as set out in this document.

7.6 NOTIFIABLE DISEASES POLICY

Under the ACM Food Safety Program, Suppliers must include on Farm controls and manage hazards in relation to animal health, thus ensuring Milk collected is from healthy animals only. Milk collected and used for human consumption must be sourced only from animals that:

- Do not show any evidence of infectious diseases transferable to humans through Milk;
- Are in a good general state of health; and
- Are clearly identifiable through stock identification procedures.

Animals diagnosed with or showing clinical signs of an infectious diseases transferrable to humans through Milk or via the animal (for example, TB, Yersiniosis, Listeriosis, Salmonellosis, Leptospirosis and Q Fever) must be identified and isolated from the milking herd. Refer to the ACM Food Safety Program for more information about the documentation and identification method and procedures used for segregating these animals.

If Suppliers notice any unusual symptoms such as a dramatic shift in production, skin lesions, sudden deaths, downer cows etc., they should immediately remove and isolate these animals from the milking herd. It is the Supplier’s responsibility to contact their veterinarian and, if necessary, report any incident of concern to ACM immediately. Milk collection may be suspended while any investigation is ongoing and/or if recommended by either a veterinarian or any relevant regulatory body. Payment for any Milk dumped in such a situation will be at the discretion of ACM.

Suppliers must have a viable management plan/Farm procedure in place designed to address the following issues:

1. Maintain herd health program.
2. Replacement stock purchases from disease clear herds.
3. Use veterinary advice on drug use.
4. Use only veterinary drugs purchased from approved outlets.
5. Store veterinary drugs in a secure area away from the Milk room.
6. Use veterinary drugs as per label or vet instructions.
7. Record details of all infected stock or stock under treatment.

8 GENERAL

8.1 INSURANCE

ACM recommends Suppliers maintain adequate farm insurance to cover any incidences of Milk loss, contamination, or damage to other suppliers' Milk, plus any disposal costs (for example, as may be incurred under part 4.2.2).

Supplier inquires in relation to insurance should be directed to (supplier@acmilk.com.au).

8.2 SAFE WORKING ENVIRONMENT

ACM does everything reasonably possible to provide a safe working environment for all of its stakeholders including Suppliers and its own employees and agents. ACM does not tolerate offensive, abusive, bullying, discriminatory or otherwise unlawful behaviour or any form of harassment ("**Offending Behaviour**").

If a Supplier engages in Offending Behaviour, ACM may suspend or terminate this Milk Supply Agreement.

8.3 CONTACT INFORMATION

AUSTRALIAN CONSOLIDATED MILK PTY LTD

9 DEFINITION & INTERPRETATION OF TERMS

This document, together with the General Terms and Conditions forms part of ACM's Agreement for the supply of Milk. All words set out in this document, unless otherwise indicated, have the meanings described in clause 1 of the General Terms and Conditions.

In this document:

Corrective Action Plan means a plan designed by Supplier in consultation with ACM to address any circumstance in which Milk does not comply with ACM's Premium Quality Standards. Corrective Action Plans must be developed and implemented in compliance with a Food Safety Program.

Corrective Action Report (CAR) means a report made in relation to a Corrective Action Plan.

Customer Risk Assessment means any test or other risk assessment undertaken by customers of ACM who take delivery of Milk.

Food Safety Program means a food safety program for dairy farms which has been approved by relevant State Regulatory Authorities (DFSV, NSWFA, TDIA).

General Terms and Conditions means the general terms and conditions for the supply of Milk which forms part of the Milk Supply Agreement under which ACM accepts the supply of Milk from Suppliers.

Milk means conventional Milk.

Milk Supply Agreement means the General Terms and Conditions and the Schedules to the General Terms and Conditions including this document.

Minimum Composition Standard means the requirements pertaining to the composition of protein and fat in Milk supplied to ACM.

Premium Quality Specifications means the six specifications that Milk supplied to ACM must meet in order to be regarded as Premium Quality Details of the Premium Quality Specifications are set out in Part 3 of Specification Guide.

Prior Notification means a notification to ACM that Milk is or may be unsuitable for collection which is made by Supplier before a Tanker arrives at the Farm. See part 4.1.

Specification Guide means this document being schedule B to the General Terms and Conditions and forming part of ACM's Supply Agreement.
